Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24, 25, 27, 28, 30-32, 34, 35, 37, 39, 40, 42, 43, and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by Tantry et al.

Tantry et al. shows, figure 6, an object-oriented architecture for factory floor management (supply chain network). There are multiple barcode readers (DSE), which are linked to communication managers (adapters). The combination of the two is a (SDA). Standard TCP/IP protocol is used (Universal Protocol). Database 66 is the data center. Application servers are the site servers and event handlers. Callback routines map user interactions from the X-server (X-events) to specific Application Engine functionality. Thus, Application Engines bridge the user interface widget library (description documents) with the factory services/factory object library.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 26, 29, 33, 36, 38, 41, and 44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tantry et al.

Tantry et al. shows all of the limitations of the claims except for specifying the use of XML dotted notation

The examiner takes Official Notice that the use of XML and dotted notation are old and well known and that it would be obvious to use them in order to take advantage of standardized methods.

Based on the discussion above, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Tantry et al. system to use XML and dotted notation in order to take advantage of standardized methods.

Response to Arguments

Applicant's arguments with respect to all the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cuff whose telephone number is (571) 272-6778. The examiner can normally be reached on 8:00 to 5:30.
